Profile

I'm a motivated analytical Computer & Systems Engineering student at Helwan University, with a strong focus on Artificial Intelligence, Machine Learning, and Data Science.
I've experience in dynamic web application development. I'm especially adept at transforming complex data into actionable insights through preprocessing, visualization, and predictive modeling.

Skills

Programming Languages:

- Python
- HTML5
- .NET / .NET Core
- PHP
- laravel(framwork)
- CSS3
- JavaScript
- SQL

Machine Learning:

- Scikit-learn
- Matplotlib
- Pandas
- NumPy

Database Management:

- MySQL

Projects

- Gym Management System (PHP & MySQL): Built a responsive web application to manage coaches, clients, and courses with add, update, delete functionalities and styled alerts. Link to view :GYM

- Movie Booking System(laravel&MySQL):I developed a Movie Booking System 🎥 — a full-stack web application where users can browse movies, book tickets, and manage reservations.This project helped me apply everything I learned — from front-end design to database management and server-side logic — and truly connect all the pieces of full stack development.
  You can review its demo from here https://bit.ly/4nwC1XH
- Movie Recommendation System (Python, Flask): Developed a recommendation app allowing users to input a movie and receive tailored suggestions based on similarity algorithms.
- Pharmacy Management System (PHP & Laravel) :Developed a comprehensive management application for pharmacies to track inventory, manage drug records, and streamline sales workflows.GitHub Repository: 3seem/pharmacy-management

Volunteer

- IT and Digitalization Support — Pixels [sep,2024] – [Aug,2025]

Courses

- NTI Artificial Intelligence Ambassadors Program March – April 2025
  I gained valuable knowledge and skills that enhanced my understanding of AI and its real-world applications. Explored popular AI platforms such as OpenAI's ChatGPT, DeepSeek, and other emerging tools. Practiced using AI to analyze data, generate text, create images, and automate tasks.
- Full Stack Web Development using PHP & Laravel july – Augest 2025
  Throughout this program, I explored and practiced: Building responsive front-end interfaces using HTML, CSS, and JavaScript, Managing databases using SQL & MySQL, Developing robust back-end systems with PHP , Building dynamic and scalable web applications using Laravel
- Data Scientist – Digital Egypt Pioneers Initiative (DEPI) June – December 2025
  Completed training covering core data science concepts, data preprocessing, exploratory data analysis, and predictive machine learning models.

Education

Faculty of engineering computer and Systems Department Helwan university 2022-2027
